LOGBOOK
MONTH: September

Date:	1 September 2026	
Tuesday	1. What did I complete since the last standup?	Reviewed SQL database concepts including tables, views, indexes, and relationships. Practiced SELECT statements with filtering and sorting. Revised primary keys and foreign keys. Identified key skills required for a SQL Server DBA role.
	2. What am I planning to complete between now and the next standup?	Continue strengthening SQL query-writing skills. Practice JOIN operations. Explore database normalization concepts.
	3. What are my impediments (or risks or problems)?	Need additional practice with complex queries. Limited exposure to enterprise database environments.

Date:	2 September 2026	
Wednesday	1. What did I complete since the last standup?	Practiced INNER JOIN, LEFT JOIN, RIGHT JOIN, and FULL OUTER JOIN. Worked with aggregate functions such as COUNT, SUM, AVG, MIN, and MAX. Explored GROUP BY and HAVING clauses. Solved practical SQL exercises.
	2. What am I planning to complete between now and the next standup?	Begin learning T-SQL concepts. Study SQL Server-specific functions. Work with subqueries.
	3. What are my impediments (or risks or problems)?	Some difficulty understanding complex joins with multiple tables. Need more practical data sets to practice against.

Date:	3 September 2026	
Thursday	1. What did I complete since the last standup?	Introduced to Transact-SQL (T-SQL). Learned variable declarations and assignments. Practiced IF statements and CASE expressions. Executed basic scripts in SQL Server environments.
	2. What am I planning to complete between now and the next standup?	Learn stored procedures. Explore SQL Server system databases. Continue T-SQL exercises.
	3. What are my impediments (or risks or problems)?	Need additional time to understand procedural programming concepts. Limited familiarity with SQL Server-specific syntax.

Date:	4 September 2026

Friday	1. What did I complete since the last standup?	Created and modified stored procedures. Worked with user-defined functions. Practiced parameterized queries. Understood code reusability within SQL Server.
	2. What am I planning to complete between now and the next standup?	Learn about SQL Server Management Studio (SSMS). Execute administrative SQL scripts. Explore SQL Server security basics.
	3. What are my impediments (or risks or problems)?	Debugging stored procedures takes longer than expected. Need more exposure to production-style code.

Date:	8 September 2026	
Tuesday	4. What did I complete since the last standup?	Installed and configured SQL Server Management Studio (SSMS). Connected to a local SQL Server instance. Explored Object Explorer and database objects. Executed SQL scripts through SSMS.
	5. What am I planning to complete between now and the next standup?	Learn SQL Server security administration. Create logins and users. Investigate backup and restore functionality.
	6. What are my impediments (or risks or problems)?	Navigating large SQL Server environments can be overwhelming initially. Need to become familiar with all SSMS administrative features.

Date:	9 September 2026	
Wednesday	4. What did I complete since the last standup?	Learned SQL Server authentication methods. Created SQL Server logins and database users. Assigned database roles and permissions. Reviewed security best practices.
	5. What am I planning to complete between now and the next standup?	Study backup and recovery processes. Practice restoring databases. Understand recovery models.
	6. What are my impediments (or risks or problems)?	Need additional practice in managing permissions. Risk of misconfiguring security settings during learning exercises.

Date:	10 September 2026	
Thursday	4. What did I complete since the last standup?	Learned Full, Differential, and Transaction Log backups. Practiced backup generation through SSMS. Performed database restoration exercises. Studied SQL Server recovery models.

	5. What am I planning to complete between now and the next standup?	Explore SQL Server Agent. Learn job scheduling. Study maintenance plans.
	6. What are my impediments (or risks or problems)?	Backup strategies vary depending on business requirements. Restoring large databases can be time-consuming.

Date:	11 September 2026	
Friday	4. What did I complete since the last standup?	Explored SQL Server Agent. Created scheduled jobs. Reviewed job history and execution status. Studied automated maintenance tasks.
	5. What am I planning to complete between now and the next standup?	Learn performance monitoring. Explore Dynamic Management Views (DMVs). Investigate wait statistics.
	6. What are my impediments (or risks or problems)?	Limited understanding of enterprise maintenance standards. Need experience troubleshooting failed jobs.

Date:	15 September 2026	
Tuesday	7. What did I complete since the last standup?	Learned SQL Server performance fundamentals. Explored Dynamic Management Views (DMVs). Analyzed CPU and memory usage indicators. Investigated wait statistics.
	8. What am I planning to complete between now and the next standup?	Learn query tuning techniques. Analyze execution plans. Identify long-running queries.
	9. What are my impediments (or risks or problems)?	Performance metrics can be difficult to interpret. Need more real-world workload examples.

Date:	16 September 2026	
Wednesday	7. What did I complete since the last standup?	Reviewed execution plans. Identified inefficient queries. Learned indexing fundamentals. Practiced query optimization techniques.
	8. What am I planning to complete between now and the next standup?	Begin defining the SQL Server Health Dashboard project. Identify DBA monitoring requirements. Gather dashboard metrics.
	9. What are my impediments (or risks or problems)?	Need deeper knowledge of indexing strategies. Some execution plans are complex to analyze.

Date:	17 September 2026	
Thursday	7. What did I complete since the last standup?	Researched key responsibilities of a SQL Server Database Administrator. Identified critical SQL Server health metrics to monitor. Defined dashboard requirements focusing on backup status, failed jobs, blocking sessions, and database growth. Started documenting business and technical requirements.
	8. What am I planning to complete between now and the next standup?	Investigate long-running query monitoring. Explore blocking and deadlock detection methods. Define dashboard success criteria.
	9. What are my impediments (or risks or problems)?	Need to prioritize the most valuable DBA metrics. Limited access to production-level monitoring scenarios.

Date:	18 September 2026	
Friday	7. What did I complete since the last standup?	Learned how blocking occurs within SQL Server. Studied deadlock concepts and their impact on performance. Executed scripts to identify blocked sessions. Reviewed troubleshooting approaches used by DBAs.
	8. What am I planning to complete between now and the next standup?	Explore sp_WhoIsActive. Learn how to diagnose active sessions. Add blocking metrics to dashboard requirements.
	9. What are my impediments (or risks or problems)?	Understanding complex blocking chains requires practice. Need sample scenarios to simulate deadlocks.

Date:	22 September 2026	
Tuesday	10. What did I complete since the last standup?	Installed and configured sp_WhoIsActive. Executed diagnostic queries to view active connections. Analyzed running processes and resource consumption. Reviewed query execution information.
	11. What am I planning to complete between now and the next standup?	Investigate long-running query detection. Capture execution statistics for dashboard reporting. Document monitoring scripts.
	12. What are my impediments (or risks or problems)?	Large volumes of diagnostic information can be difficult to interpret. Need better understanding of query resource consumption.

Date:	23 September 2026

Wednesday	10. What did I complete since the last standup?	Developed SQL scripts to identify long-running queries. Analyzed execution duration and resource usage. Reviewed execution plans for slow queries. Documented common performance bottlenecks.
	11. What am I planning to complete between now and the next standup?	Investigate wait statistics. Gather throughput and latency metrics. Finalize dashboard monitoring categories.
	12. What are my impediments (or risks or problems)?	Limited historical performance data. Some query performance issues are difficult to reproduce.

Date:	24 September 2026	
Thursday	10. What did I complete since the last standup?	Learned about SQL Server wait statistics. Identified common wait types affecting performance. Collected baseline performance metrics. Mapped metrics to dashboard requirements.
	11. What am I planning to complete between now and the next standup?	Design dashboard architecture. Define backend data collection process. Identify required APIs.
	12. What are my impediments (or risks or problems)?	Understanding wait types requires further DBA experience. Need a strategy for storing collected metrics.

Date:	25 September 2026	
Friday	10. What did I complete since the last standup?	Designed the overall dashboard architecture. Defined backend and frontend responsibilities. Identified required SQL Server monitoring scripts. Planned data flow between SQL Server and dashboard.
	11. What am I planning to complete between now and the next standup?	Set up the Spring Boot project. Configure SQL Server connectivity. Create the initial project structure.
	12. What are my impediments (or risks or problems)?	Ensuring dashboard design remains scalable. Determining the best way to organize monitoring modules.
